**Re: Dare County Nourishment Project
Request for Information 001 – Obstruction at Station 98+00**

Dear Mrs. Malick:

Due to safety concerns related to an obstruction that was encountered during the before dredge (BD) survey at the Town of Duck Station 98+00 while using the CRAB, Great Lakes Dredge & Dock Company (GLDD) has requested to represent the remaining portion of the BD survey at Station 98+00 by interpolation utilizing the survey data from the two adjacent lines. The BD survey data provided by GLDD on May 25, 2017 at Stations 97+00, 98+00 and 98+83 was reviewed, and based on the provided survey data, this proposal is acceptable.

Please let me know if you have any additional questions.

Regards,

COASTAL PLANNING & ENGINEERING OF NORTH CAROLINA, INC.
